FOR IMMEDIATE RELEASE

SPATIALInfo Taps Industry Veteran to Lead Strategic Planning and Development

John Lynch to define corporate direction, cultivate partnerships and help build organization for rapid growth

ENGLEWOOD, Colo. Jun. 6, 2011—[SPATIALInfo](http://www.spatialinfo.com) has recently named John Lynch as executive vice president of corporate development. With its 2011 fiscal year-end revenues expected to double from last year, SPATIALInfo is keen to develop the corporate partnerships and investor relationships that John has experience cultivating.

“John joins SPATIALInfo at an exciting time for our company. His expertise in defining corporate direction and investment strategy will play a key role in ensuring that SPATIALInfo achieves the level of success that is possible in the global marketplace,” said Greg Foster, CEO of SPATIALInfo.

John Lynch’s career spans more than 25 years and several senior executive roles with market leaders in the design and mapping segment. Most recently, he held the position of senior vice president of portfolio development at Bentley Systems, Inc. where he was responsible for strategic partnerships and acquisitions, and directed over 25 acquisitions in 5 new market segments. Previously, John was vice president of product development and CTO at Autodesk, where he managed multiple major product releases which included the company’s flagship product, AutoCAD.

SPATIALInfo will utilize John Lynch’s broad experience in leading multiple facets of the business, particularly his expertise in defining corporate strategy and direction and building organizations that lead to scalable businesses during periods of rapid growth.

[About SPATIALInfo](#)

SPATIALInfo, with offices in Melbourne, Victoria and Englewood, Colorado, specializes in developing network-management software solutions for the cable and telecommunications industries. [SpatialSUITE products](#) make it easy for professionals to map, model and manage complex inside plant (ISP) and outside plant (OSP) communications networks. From the POI to the service address and everything in between, spatialSUITE’s performance makes it the ideal choice for businesses that want to leverage the network asset data of their fiber, copper and RF networks. For more information, please call Karinn Koback at +1 720 873 6880 x122 or visit www.spatialinfo.com.
